

MODEL SSJ SUPER SERVICE JACK

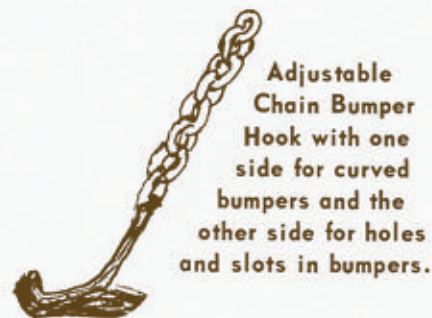

CAPACITY - - - - - 2500 Lbs.

USE IT ON A HARD
SERVICE STATION DRIVE

OR ON

SOFT, SANDY SOIL

LIFT ON BUMPER OR FRAME

Adjustable
Chain Bumper
Hook with one
side for curved
bumpers and the
other side for holes
and slots in bumpers.

VEHICLE BEING LIFTED BY FRAME BAR AND JACK

Anyone that changes tires would like the MODEL SSJ. It's easy and safe to use. Easy, because in a half minute or less the tire is off the ground. Safe, because as the vehicle is being lifted the large wheels, with tires and tubes, rolls under the load. If the lifted unit accidentally moves the jack will roll with the load and will not dump its load.

The Model SSJ is light, only 50 lbs. It's easy to put on and off the service truck.

SSJ-Z1 JACK SET consists of jack, jack frame bar
(Patent No. 3618894)
