

## Model UTJ Tractor Lift System

**Especially designed to lift or to roll tractors...**

**Ideal for farm tractor maintenance, golf course maintenance shops or tractor restorers**

The UTJ Tractor Jack is made with a wide adjustable saddle to hold a variety of loads more securely. It's easy to change wheels, lift sections, as well as roll tractor ends.

### Specifications:

|                     |                 |
|---------------------|-----------------|
| Capacity            | 10,000 lbs.     |
| Wheels (4)          | 4" Steel swivel |
| Frame dimension     | 26" square      |
| Low height          | 20"             |
| High height         | 32"             |
| Jack travel         | 12"             |
| Side rail tube low  | 25"             |
| Side rail tube high | 38"             |

This tube is included with each UTJ for lifting tractor side rails.

**4" Swivel Casters**  
double ball race with roller bearings for easy maneuvering

**10,000 lbs. Capacity**

Because of the unique square design, the UTJ does not protrude into work areas when in use.

Make a few saddle adjustments, start jacking, and within a few seconds the tractor is lifted.
